Net Insight Interim Report
January – March 2017
Net Insight AB (publ) reg.no. 556533–4397

Quote from CEO Fredrik Tumegård:
“Net sales for the first quarter were SEK 110.4 million, with operating earnings of SEK 7.5 million. This was in line with the corresponding period last year. We perceive a strong demand for our network-based operations, and great interest in our live OTT offering.”

First quarter 2017

• Net sales amounted to SEK 110.4 (110.0) million, a decrease of -3.6 percent in comparable currencies.
• Operating earnings amounted to SEK 7.5 (7.8) million, corresponding to an operating margin of 6.8 (7.1) percent. Adjusted operating earnings were SEK 8.9 (11.2) million, corresponding to an adjusted operating margin of 8.0 (9.9) percent.
• Net financial items were positively affected by SEK 6.0 (9.0) million for the revaluation of synthetic options. Net income was SEK 11.9 (14.0) million.
• Total cash flow was SEK 15.3 (11.8) million.

SIGNIFICANT EVENTS

Net Insight in new collaboration with bet365 and SIS in live OTT.
Delivery of Ultra HDTV (4K) licenses for a central European sporting league.
Winner of 2017 WTA Teleport Technology of the Year Award for ScheduALL Connector.
CEO’s statement

The high activity level from the end of 2016 has continued into the first quarter of 2017. We see a strong demand on our network-based offering, even if we don't have any larger international sporting events that drives sales this year. At the same time we see a great interest in Sye, our live OTT offering, where several parallel tests take place.

A number of global sporting events drove sales in 2016, as many of our customers chose to upgrade their systems ahead of the Olympics and Euro 2016 soccer championships. Even if 2017 will be less busy in terms of sporting events, we're already returning results in line with last year, which shows the strength of our business. In the first quarter, we also delivered Ultra HDTV (4K) licenses for a central European sporting league and in March Net Insight’s ScheduALL Connector won the World Teleport Association’s (WTA) 2017 Award for Teleport Technology of the Year.

Net sales for the first quarter were SEK 110.4 million, in line with the corresponding quarter last year (SEK 110.0 million). Operating earnings were SEK 7.5 million in the first quarter 2017, compared to SEK 7.8 million in the previous year. The quarter was characterized by normal quarterly fluctuations, strong underlying business, a stable flow of medium-sized deals, while there were no larger individual transactions in the period. Although we're not completely satisfied with the outcome for the first quarter, we feel that we're well positioned both in short and long term.

We now have a product portfolio that comprises three product lines – Nimbra, ScheduALL and Sye. Our total offering stretch “from the TV camera lens to the studio, right through to the TV viewer” has made us more relevant to our 500 customers in 60 countries. At the same time, we're continuing to strengthen our position as the global leader on a market undergoing major transformation with extensive technology shifts.

We're continuing to develop and strengthen our sales organization and improve competencies in value-based sales. This applies both to our live OTT offering and network-based solutions. We will also focus on increased marketing activities and continue the journey towards a more customer focused company.

Great interest in Sye

A year ago, our product portfolio didn’t include Sye, our live OTT offering – something that is hard to imagine today. Sye is now a natural part of Net Insight, and we're still the only industry operator able to offer synchronized live transmission over the internet across all screens. We're continuing to see a great interest, and are running multiple parallel tests. That means that we have come further in the test phase and that the response is positive.

The launch of Sye is proceeding with unwavering strength. The investment rate in our live OTT operations increased by 50 percent compared to the same period previous year. However, as always, it takes time for new technology to gain a foothold on the market, particularly as we need to take a number of different stakeholders into account, who will need to understand that live OTT is able to generate new customer bases and revenue streams. It’s not only broadcasters that need to adjust the technology, but production companies are also working to develop formats and contents.

New collaborations with SIS and bet365

In the quarter, we initiated new collaborations with companies including SIS and bet365. The fact that our first contracts were signed with betting market operators isn’t unexpected, as there are numerous new revenue streams to evaluate and exploit in this arena. In addition, the gambling industry is one of the most active in terms of product development for live broadcasting of sporting events. Bet365 is a globally leading betting and gambling group, and the first part of the collaboration relates to the integration of Sye in the bet365 app. SIS is a leading supplier of products and services for the online and betting market, and the company will implement our Sye platform in its streaming service. Overall, this means that online audiences will get a better, more qualitative and synchronized gambling experience. Ultimately, this will lead to the development of new types of products and services.

We look forward to continued exciting progress in 2017.

Stockholm, May 2017

Fredrik Tumegård, CEO
REVENUES

Net sales in the first quarter of 2017 were SEK 110.4 (110.0) million, which was in line with the corresponding period last year. In comparable currencies, net sales decreased by -3.6 percent. This mainly relates to a stronger USD against the SEK compared to the first quarter 2016. The quarter was characterized by normal quarterly fluctuations, strong underlying business, a stable flow of medium-sized deals, while there were no larger individual transactions in the period. In 2016, sales were positively affected by global sporting events such as the Olympics. There are fewer such major events in 2017, which means that an increased focus on local and regional sporting and live events will be important to continued growth.

Sales in the Western Europe region were SEK 48.0 (47.8) million. Sales were mainly to the company’s existing customers, with Germany and Switzerland making positive progress while northern Europe was weaker than last year. Net Insight delivered Ultra HDTV (4K) licenses to a central European sporting league in the first quarter. The company is well positioned in this technology, but the market remains slightly hesitant because a full upgrade to 4K requires substantial investment by operators and broadcasters.

Net sales in the Rest of World region were SEK 28.6 (26.9) million, a 6.3 percent increase. The increase is mainly driven by positive exchange rate effects. Sales in the quarter were driven by extension deals in the Middle East, southern Africa and Australia.

Net sales in the Americas region were SEK 33.8 million (35.2) million, equivalent to a decrease of -4.0 percent. The decrease is primarily sourced from the network business and is within normal variations between quarters.

Net sales in the Broadcast & Media (BMN) business area were 92 (81) percent, in Digital Terrestrial TV (DTT) 8 (17) percent and in CATV/IPTV 0 (2) percent of total sales. The strong increase in business transactions in BMN and the low share of DTT business are both line with a trend that has been underway for a number of years. However, the relatively sharp variation on last year can be ascribed to normal quarterly fluctuations.

Net sales from hardware were SEK 44.0 (44.7) million. Net sales from software licenses were SEK 28.3 (30.0) million, and support and services amounted to SEK 38.1 (35.5) million. The above figures exclude other operating revenue of SEK -0.0 (-0.2) million, which consists of translation differences on accounts receivable in foreign currencies.
Gross profit in the first quarter was SEK 65.9 (67.8) million, generating a gross margin of 59.7 (61.7) percent, a reduction on the previous year. The decrease mainly relates to increased costs in the service delivery organization, which was partly offset by positive currency effects.

Operating expenses in the first quarter were SEK 58.4 (60.0) million. The decrease is due to a reduction in development expenses of SEK 5.1 to SEK 12.4 (17.5) million. The decrease is a result of increased capitalization of development projects. Total development expenditure was SEK 39.5 (37.5) million, increase attributable to more resources in live OTT. Sales and marketing expenses increased to SEK 34.3 (31.2) million as a result of slightly increased resources, mainly in live OTT, and increased costs mainly for the US organization resulting from a weaker SEK. Operating expenses decreased by SEK 1.2 (2.0) million as a result of revaluation of share-based incentive programs, see table Material profit and loss items on page 6.

Operating earnings were SEK 7.5 (7.8) million, equating to an operating margin of 6.8 percent against 7.1 percent for the comparable period in the previous year. Despite increased development expenditure, development expenses decreased by SEK 5.1 million year-on-year as a result of increased capitalization. Adjusted operating earnings, see table page 6, was SEK 8.9 (11.2) million, corresponding to an adjusted operating margin of 8.0 (9.9) percent. The lower adjusted operating earnings figure is mainly due to a slight decrease in sales volumes and gross margin.

In the first quarter, net financial items were positively affected by SEK 6.0 (9.0) million in value changes in the synthetic options programs introduced in 2015 and 2016. Net financial items amounted to SEK 5.5 (8.5) million. Profit/loss before tax was SEK 13.0 (16.3) million.

Net earnings for the period were SEK 11.9 (14.0) million, resulting in a net margin of 10.7 (12.8) percent.

Cash flow for the first quarter was SEK 124.6 (121.7) million, and net earnings were SEK 18.2 (19.3) million.

Operating earnings were SEK 75 (78) million, equating to an operating margin of 6.8 percent against 71 percent for the comparable period in the previous year. Despite increased development expenditure, development expenses decreased by SEK 5.1 million year-on-year as a result of increased capitalization. Adjusted operating earnings, see table page 6, was SEK 89 (112) million, corresponding to an adjusted operating margin of 80 (99) percent. The lower adjusted operating earnings figure is mainly due to a slight decrease in sales volumes and gross margin.

In the first quarter, net financial items were positively affected by SEK 60 (90) million in value changes in the synthetic options programs introduced in 2015 and 2016. Net financial items amounted to SEK 55 (85) million. Profit/loss before tax was SEK 130 (163) million.

Net earnings for the period were SEK 119 (140) million, resulting in a net margin of 10.7 (12.8) percent.

Cash flow for the first quarter was SEK 153 (118) million. The positive cash flow is primarily due to lower working capital, attributable to customer payments received. Cash and cash equivalents at the end of the quarter were SEK 2301 (2049) million.

Remaining tax loss carry-forwards for Group companies were SEK 45.2 (86.7) million at the end of the period.

Equity was SEK 575.8 (543.6) million, with an equity/assets ratio of 78.2 (77.8) percent.

(a) Support revenues that ScheduALL would have recognized if they had remained a stand-alone entity, but that Net Insight is not permitted to recognize as revenue under IFRS as a result of business combination accounting rules. The effects of these business combination rules will gradually decrease.

(b) Amortizations related to the intangible assets – trademark and customer relations – that Net Insight recognized under IFRS as a result of business combination accounting rules, but that ScheduALL would not have recognized if they had remained a stand-alone entity. These amortizations will continue to affect the income over time.

(c) Share-based benefits are value changes in amounts held in escrow for participation in the synthetic share program.

(d) During the second quarter of 2015 and 2016, after decision at the AGM, Net Insight introduced synthetic option programs. The synthetic options are reevaluated on a current basis to fair value by applying an options valuation model. The changes in value during the term of the options are presented as a financial item. To financially hedge future cash flow effects of the company's commitments in the synthetic option programs, if the share price would exceed the strike price, the parent company has repurchased its own shares. The repurchased of own shares is deducted from equity, retained earnings, and are not revaluated to fair value on a current basis.

(e) Development expenses in the first quarter of 2016 was charged with an expense of SEK 3.4 million as a result of a minor reorganization of the R&D operations aimed at rationalizing the development process.

CONSOLIDATED INCOME STATEMENT, ADJUSTED

We believe that the disclosed supplemental non-IFRS financial information provides useful information to investors because management uses this information, in addition to financial data prepared in accordance with IFRS, to attain a more transparent understanding of Net Insight's performance during the first quarter of 2017. The adjustments below refers to some of the items listed in the section Material profit and loss items above and the notes refers to this section. Corresponding adjustments have been made for the comparative periods:

**Financial instruments in tier 2**

The fair value of derivative instruments is measured using exchange rates of currency forwards on the reporting date. The closing balance for synthetic options represents the total assessed value of a number of outstanding options, which has been measured on the basis of accepted market principles and are based on Net Insight's share price.

ACCOUNTING POLICIES
This Interim Report has been prepared in accordance with IAS 34 Interim Financial Reporting and applicable regulations of the Swedish Annual Accounts Act. The Interim Report of the parent company complies with chapter 9 of the Swedish Annual Accounts Act, Interim Financial Reporting, and RFR 2 Accounting for Legal Entities.

Disclosures in accordance with IAS 34:16A are presented in the interim financial statements and the associated notes as well as elsewhere in the interim financial report.

The preparation of the Interim Report requires management to make judgements, estimates and assumptions that affect the company’s earnings and position and information presented generally. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The same accounting principles and basis of calculation as those used in the latest Annual Report have been applied to the group and parent company. For a description of these accounting principles, please refer to the Annual Report.

Figures in brackets in this report refer to comparison with the corresponding period or date in the previous year. Divergences due to rounding may occur in this report.

CONTRIBUTED EQUITY
At the end of the reporting period, the parent company had a total of 4,275,000 of its own class B shares, at an average cost of SEK 4.22 per share and with a par value of SEK 0.04 per share. The shares are held as own shares. The parent company has the right to reissue these shares at a later date.

Total amount of class B shares in Net Insight are 388,933,099. At the end of the reporting period, there were 1,000,000 class A shares and 388,933,099 class B shares outstanding. All shares issued by the parent company were fully paid.

SIGNIFICANT EVENTS AFTER THE REPORTING PERIOD
No significant events have occurred after the end of the reporting period.

AUDITORS’ REVIEW
This Report has not been reviewed by the company’s auditors.

ALTERNATIVE PERFORMANCE MEASURES AND OTHER DEFINITIONS
Västeuropa (WE) Western Europe.
Americas (AM) North and South America.
Rest of World (RoW) Countries outside of Western Europe and Americas.
Alternative performance measures (APM) Non-IFRS financial measures are presented to enhance an investor’s possibility to evaluate the ongoing operating results, to aid in forecasting future periods and to facilitate meaningful comparison of result between periods. The APMs in this report may differ from similar-titled measures used by other companies.

Change in Net sales in comparable currencies The relation between the Net sales for the period, excluding Other revenues, recalculated using the foreign currency rates from the comparative period and the corresponding sales for the comparative period. Other revenue is in all material respect related to translation differences on unhedged accounts receivable in foreign currencies. Only sales from business combinations that’s been part of the Group for the whole comparative period are recalculated.

Organic growth Net sales for the period in relation to Net sales for the comparative period, excluding Net sales from business combinations that not been part of the Group for the whole comparative period. Reconciliations, see table Five-year summary on previous page.

Gross margin Gross earnings as a percentage of net sales.
Operating margin Operating earnings as a percentage of net sales.
Net margin Net Income as a percentage of net sales.
EBITDA Operating earnings before depreciation and amortization and capitalization of development expenditure. Reconciliations, see table Financial information on page 5.

EBITDA margin EBITDA as a percentage of net sales.
Operating expenses Sales and marketing expenses, Administration expenses and Development expenses.
Total development (R&D) expenditure Development expenses and capitalized expenditures for development. Reconciliations, see table Financial information on page 5.
Investments Investments in intangible and tangible assets.
Total cash flow Change in cash and cash equivalents during the period, excluding exchange differences in cash and cash equivalents.
Working capital Current assets less cash and cash equivalents, accounts payable and other interest-free current liabilities. The Company has no interest-bearing liabilities. Changes in working capital in the cash flow statement also includes adjustments for items not affecting liquidity and changes in non-current operating assets and liabilities.
Equity/asset ratio Shareholders' equity divided by the balance sheet total.
Return on capital employed Operating earnings plus interest income in relation to average capital employed, rolling four quarters. Capital employed is total assets less non-interest bearing liabilities, including deferred tax liabilities. The Company has no interest-bearing liabilities. Slightly updated definition from previous reports, comparable periods has also been updated.
Return on equity Net income as a percentage of average shareholders’ equity, rolling four quarters. Slightly updated definition from previous reports, comparable periods has also been updated.
Earnings per share (EPS) diluted and basic Net income divided by the average number of outstanding shares during the period.
Cash flow per share Total cash flow, excluding acquisition of group companies, divided by average number of outstanding shares during the period.
Equity per share diluted and basic Shareholders’ equity divided by number of outstanding shares at the end of the period.
Number of outstanding shares Total number of shares in the Parent company, less the number of group companies’ holdings of shares in the Parent company (own/treasury shares).

CEO

THIS IS NET INSIGHT
Business concept and model
Net Insight delivers products, software and services for effective, high-quality media transport, coupled with the effective management of resources, all, which creates an enhanced TV experience. Net Insight’s offerings stretch from the TV camera lens to the studio, right through to the TV viewer. Net Insight’s solutions offer network operators, TV and production companies the benefit of lower total cost of ownership and the potential for effective new media service launches.

Revenues are generated through direct and indirect sales of hardware, software and services. Revenues are primarily sourced from hardware sales, although revenues from software and services have increased in recent years.

Strategy
Our ambition is to be a growth company, and our target is to create profitable growth. On a market in fundamental transformation, we create growth and profitability through close and strategic partnerships with customers. We create innovative solutions together that make our customers successful and generate business benefit. To grow for the long term, we need to transform Net Insight into a customer and market-oriented company.

Value creators
Value drivers affect Net Insight’s progress and can be divided into three groups: market transformation, innovative technology and global reach. Net Insight benefits from the general increase in video traffic, live streaming and file transfers, the adoption of remote production and workflows, more widespread TV broadcasting over the internet and wider coverage of live events.
