INTERIM REPORT, JANUARY- JUNE 2007

Net Insight AB (publ), Corporate Reg. No. 556533-4397

January-June 2007

- **Net sales increased by 117% to SEK 108.9 million (50.1).**
- **Operating earnings improved to SEK 8.1 million (-24.6)**
- **Net income improved to SEK 8.6 million (-24.0).**
- **Gross margin of 70.6% (69.9%).**
- **Service and software revenue increased by 131% to SEK 25.0 million (10.7).**
- **Operating cash flow significantly improved to SEK -0.7 million (-36.2).**
- **Earnings per share amounted to SEK 0.02 (-0.07)**

Second quarter 2007

- **Net sales increased by 85% to SEK 55.5 million (30.0).**
- **Operating earnings improved to SEK 3.3 million (-9.8)**
- **Net income improved to SEK 3.5 million (-9.5).**
- **Gross margin of 70.7% (70.0%).**
- **Service and software revenue increased by 130% to SEK 12.4 million (5.4).**
- **Earnings per share amounted to SEK 0.01 (-0.03).**

CEO comments

The demand for Net Insight's transport solutions is strong resulting in a growing customer base. In the second quarter, the existing customer base has generated a significant amount of recurring business and important new contracts have been won.

Our strong position in the markets for Digital Terrestrial TV (DTT) and Broadcast & Media networks has supported the continued sales growth and we have built a solid base of large customers which continuously place upgrade and extension orders to their existing networks.

In the second quarter we have also continued to broaden our customer base and won some new important customers with our strong offering for demanding media transport solutions. An important contract was won in June when a large North American media company placed new orders to its terrestrial media network between the east and the west coast, including networks in New York and Los Angeles. Also, in Germany, yet another broadcaster selected Net Insight for its multi-service network to transport video, voice and data.

Our recently introduced products have also been very well received and have further strengthened our competitive position. Our network of value added resellers continue to expand our market reach.

The demand for greater capacity and improved quality in communications networks around the world are essential market drivers for Net Insight, which continue to improve our financial performance. As a result, second quarter sales have continued to increase at the same time as we report strong gross margin.

Business activities during the second quarter

During the second quarter, new orders have been received from customers in Net Insight's prioritized market segments in Europe, North America and Asia.

Sales in Europe are strong and have continued to grow in the Broadcast and Media segment, as well as the rapidly growing market for Digital Terrestrial Television (DTT). In North America our continued focus to better utilize our potential there is starting to pay off. In Asia the activity level has increased since we recently opened the Singapore office to support our market establishment in the region.

In Norway the DTT network rollout continued and Net Insight received further orders from Norkring under the frame agreement for the DTT network signed in 2006.

KPN Broadcast Services has placed orders to upgrade its Dutch media network. KPN's multi-service media network is based on Net Insight's Nimbra platform and has been operational since the beginning of 2006. The upgrade of KPN's core network extends the capacity of existing real-time critical DVB-T distribution as well as real-time contribution services and is the foundation for KPN's new services.

Additional orders were also received from EBU (European Broadcasting Union) who added new Nimbra nodes to expand its media network that covers the largest media cities and serves public TV broadcasters in Europe.

Yet another German broadcaster selected Net Insight for its regional TV-network. The multi-service network will handle TV and radio contribution and distribution feeds, as well as data services, between the customer's production facilities. This initial order was followed by add-on orders for increased network capacity.

A large North American media company placed new orders with Net Insight to its terrestrial media network between the east and the west coast, including networks in New York and Los Angeles. The network implementation will be in four phases with the first delivery during the second quarter this year.

Net Insight received an order from another new US customer, Pacific Television Center. The Nimbra equipment will serve as the foundation for PacTV's continually expanding terrestrial broadcast network.

Partnerships

The partner strategy is aimed to support the sales growth and the network of partners continues to expand the geographical reach. A few new partners have been added in the second quarter and at the end of the period Net Insight had 23 local partners worldwide. The partner network will be further expanded.

Marketing activities

At NAB2007 in Las Vegas Net Insight demonstrated the full Nimbra range and introduced a new product, the 8*HD/SD SDI Module. Net Insight also made the presentation "Solving the QoS Bottleneck in Video and Triple Play Networks" at the Telecom@NAB2007 seminar.

Net Insight exhibited at CommunicAsia, Asia's largest media & broadcast trade show. Additionally, the Asian partner network has presented Net Insight products at multiple trade shows like Shanghai TV Festival, IMMC in Tokyo and the KOBA Show in Seoul.

Also, Net Insight has been featured in international press articles during the quarter including Broadcast Engineering's "Digital Handbook".

New product introductions

Recently introduced products have been well received and are increasingly contributing to overall sales. The Nimbra platform is a well-proven and cost-efficient solution for converged next generation networks with full quality of service in video transport.

A high-density HD/SD serial digital interface (SDI) module for the Nimbra 600 series was introduced at the NAB2007 exhibition. The new module expands uncompressed high-definition (HD) and standard-definition (SD) broadcast options within networked environments. Deployed in a Nimbra 680 switch, the new module enables an unprecedented density of uncompressed video services. Up to 24 HD-SDI services may be multiplexed onto four 10Gbps outputs within a single chassis. Such a high-density solution is essential for deployment e.g. at arenas in major sports events.

Significant events after the end of the period

In August an order was received from a large European media operator. This is a new customer and the order also establishes Net Insight in a new large market in Europe.

In Asia, marketing activities by the partner network continued with the SMPTE exhibition in Sydney.

Outlook

The Board believes that the Company will increase sales substantially in 2007, however sales can fluctuate between the quarters due to the sales processes of larger systems, which means that the Board maintains its outlook from the first quarter 2007 and the annual report 2006.

Sales and earnings six months and second quarter

Six months

Net sales during the first half-year increased by 117% to SEK 108.9 million (50.1). Sales in Europe accounted for 86% (79), North America 13% (20), and Asia 1% (1) respectively. Sales of software and services (professional services, support, maintenance and training) increased to SEK 25.0 million (10.7) and accounted for 23% of total revenue.

Net income amounted to SEK 8.6 million (-24.0). The financial net amounted to SEK 0.5 million (0.6). The improvement of the operating earnings is attributable to higher revenue with a continuous strong gross margin. Furthermore, increased volumes of the product series Nimbra 300 and 600 have also contributed positively to the earnings.

The total operating expenses amounted to SEK 70.6 million (59.6). To meet the higher demand new resources have been added to sales, professional services, and development according to plan. Provision for social costs of the personnel option programs based on the options' actual value on the balance sheet date and the IFRS 2 cost of the new personnel option program issued in May 2007 have affected operating expenses by SEK 2.4 million. Furthermore, depreciation of capitalized development costs is SEK 6.0 million higher than previous year.

Other operating revenue of SEK 1.9 million is made up of premiums for exercising of the personnel option programs.

Second quarter

Net sales increased by 85% to SEK 55.5 million (30.0).

Retained solid gross margin at 70.7% (70.0) despite substantial increase in revenue.

Net income for the quarter amounted to SEK 3.5 million (-9.5). Provisions for social costs of the personnel option programs and IFRS 2 cost of the new personnel option program has negatively impacted net income for the quarter by SEK 1.4 million. Furthermore, an increased number of employees and higher depreciation of SEK 3.1 million explain the higher operating expenses.

Premiums for the personnel option programs of SEK 0.9 million has positively impacted net income.

Quarterly revenue and net income

Cash flow and financial position

Net cash position for the first six months was improved by SEK 26.9 million to SEK 83.6 million (56.7) compared to previous year.

Cash flow from operations for the first six months improved significantly to SEK -0.7 million (-36.2).

Cash flow from operations during the second quarter amounted to SEK -4.7 million (-18.5). The negative operating cash flow in the quarter is mainly due to temporary build up of the inventory and investments in product development.

Cash and cash equivalents at the end of the six months period was SEK 90.0 million (71.6). Redemption of personnel options provided SEK 6.6 million in cash. On the balance sheet date, Net Insight had utilized SEK 6.4 million out of total credit and factoring facilities of SEK 75 million.

Investments

Investments in tangible assets for the first six months amounted to SEK 0.7 million (0.2). Capitalized development costs, reported as intangible assets, amounted to SEK 24.3 million (21.8) and depreciation amounted to SEK 18.2 million (12.2). At the end of the period, net book value of capitalized development costs amounted to SEK 65.6 million (53.3).

Employees

At the end of the period Net Insight had 93 (78) employees. The parent company Net Insight AB had 85 (71) employees and the US subsidiary Net Insight Inc. had 8 (7) employees.

Parent company

The Parent company's net turnover was SEK 126.1 million (65.4). Net income amounted to SEK -1.9 million (-18.3). Liquid funds amounted to SEK 88.7 million (70.6).

Risk and sensitivity analysis

Net Insight's operation and results are impacted by a number of external and internal factors. A continuous process identifies all existing risks and assesses how each risk shall be managed.

The risks to which the company is exposed are divided into market related risks (including competition, technology development, political risks), operational risks (including product liability, intellectual property rights, litigation, customer dependence) and financial risks (including predominately currency exposure).

The company estimates that no additional significant risks or uncertainties than those described in the annual report, has developed during the first six months of 2007.

For a complete description of the Company's risk analysis and risk management, please see pages 27-28 and 36 in the 2006 Annual report.
